**1. Nature of Operations**

Mawson Resources Limited (the “Company”) was incorporated on March 10, 2004 under the provisions of the Company Act (British Columbia). The Company is listed and trades on the Toronto Stock Exchange (“TSX”) under the symbol “MAW”. The Company’s head office is located at #1305 - 1090 West Georgia Street, Vancouver, British Columbia V6E 3V7 Canada.

The Company is a resource company engaged in the acquisition and exploration of unproven mineral interests. As at August 31, 2015 the Company has not earned any production revenue, nor found proved reserves on any of its unproven mineral interests. On the basis of information to date, the Company has not yet determined whether these properties contain economically recoverable ore reserves. The underlying value of the exploration and evaluation assets is entirely dependent on the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete development and upon future profitable production. Exploration and evaluation assets represent costs incurred to date, less amounts depreciated and/or written off, and do not necessarily represent present or future values.

The Company’s operations are funded from equity financings which are dependent upon many external factors and may be difficult to impossible to secure or raise when required. Although management considers that the Company has adequate resources to maintain its core operations and planned exploration programs on its existing exploration and evaluation assets for the next twelve months, the Company recognizes that exploration expenditures may change with ongoing results and, as a result, it may be required to obtain additional financing. While the Company has been successful in securing financings in the past there can be no assurance that it will be able to do so in the future.

**2. Basis of Preparation**

*Statement of Compliance*

These condensed consolidated interim financial statements have been prepared using accounting policies consistent with International Financial Reporting Standards (“IFRS”), and in accordance with International Accounting Standards (“IAS”) 34, Interim Financial Reporting, as issued by the International Accounting Standards Board (“IASB”). These condensed consolidated interim financial statements should be read in conjunction with the audited consolidated financial statements for the year ended May 31, 2015, which have been prepared in accordance with IFRS as issued by the IASB. The accounting policies followed in these condensed consolidated interim financial statements are consistent with those applied in the Company’s consolidated financial statements for the year ended May 31, 2015.

*Basis of Presentation*

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, revenue and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods.

**3. Significant Accounting Policies**

The preparation of financial data is based on accounting principles and practices consistent with those to be used in the preparation of the audited annual consolidated financial statements as at May 31, 2015. The accompanying unaudited condensed consolidated interim financial statements should be read in conjunction with the Company’s audited consolidated financial statements for the year ended May 31, 2015.

**10. Financial Instruments and Risk Management**

*Categories of Financial Assets and Financial Liabilities*

Financial instruments are classified into one of the following categories: FVTPL; held-to-maturity investments; loans and receivables; available-for-sale and other financial liabilities. The carrying values of the Company's financial instruments are classified into the following categories:

<b>Financial Instrument</b>	<b>Category</b>	<b>August 31, 2015 \$</b>	<b>May 31, 2015 \$</b>
Cash	FVTPL	4,199,200	4,371,419
Amounts receivable	Loans and receivables	51,116	27,557
Investments	Available-for-sale	78,363	65,751
Accounts payable and accrued liabilities	Other financial liabilities	(304,540)	(326,446)

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities and time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for amounts receivable and accounts payable and accrued liabilities approximate their fair value due to their short-term nature. The recorded amounts for cash and investments approximate their fair value. The Company's fair value of cash and investments under the fair value hierarchy are measured using Level 1 inputs.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

*Credit Risk*

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and amounts receivable. Management believes that the potential loss related to the credit risk included in cash and amounts receivable is remote.

*Liquidity Risk*

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. All of the Company's financial liabilities are classified as current and are anticipated to mature within the next fiscal period. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

*Market Risk*

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

(a) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bears floating rates of interest. The interest rate risk on cash and on the Company's obligations are not considered significant.

(b) Foreign Currency Risk

The Company's functional currency is the Canadian dollar and major transactions are transacted in Canadian Dollars, Euros and Swedish Kronors ("SEK"). The Company maintains Euros bank accounts in Finland, SEK bank accounts in Sweden, and a US Dollar bank account in Canada to support the cash needs of its foreign operations. Management believes the foreign exchange risk related to currency conversions is minimal and therefore does not hedge its foreign exchange risk. At August 31, 2015, 1 Canadian Dollar was equal to 0.68 Euro, 6.41 SEK and 0.76 US Dollar.

Balances are as follows:

	<b>Euros</b>	<b>Swedish Kronors</b>	<b>US Dollars</b>	<b>CDN \$ Equivalent</b>
Cash	85,609	88,849	311,474	549,590
Amounts receivable	20,667	11,087	17,679	55,383
Accounts payable and accrued liabilities	<u>(115,003)</u>	<u>(191,069)</u>	<u>-</u>	<u>(198,930)</u>
	<u>(8,727)</u>	<u>(91,133)</u>	<u>329,153</u>	<u>406,043</u>

Based on the net exposures as of August 31, 2015 and assuming that all other variables remain constant, a 10% fluctuation on the Canadian Dollar against the Euro, SEK and US Dollar would result in the Company's net loss being approximately \$37,000 higher (or lower).

*Capital Management*

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital that it manages as share capital, cash and cash equivalents and short-term investments. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.
